

KEW HOUSE

1. KITCHEN DINING
2. ENTRY HALL
3. MASTER ENSUITE

The challenge of creating a fully functional family home whilst maintaining the elegant nature of a period house, was the starting point for this project.

Maintaining period features, the design sought to focus the house towards the substantial rear garden and reinvigorate the period rooms and details. A significant two storey rear extension housing the kitchen, living and dining areas at ground level and a parents retreat on the upper floor, fulfilled the potential of the site without destroying the ambience of the original period home.

KEW HOUSE

- 1. CHILD'S BEDROOM
- 2. SITTING ROOM
- 3. INFORMAL LIVING
